SEED PRESALE

Halfmoon

Split a wallet's staking yield with a friend.

THE PROBLEM

Why Halfmoon

- Supporting someone monthly means the same manual transfer every month.
- Teams want to share validator rewards with contributors.

THE PRODUCT

How it works

- Stake SOL once and choose who receives the rewards.
- The principal never moves; only rewards are routed.
- Any validator, your own stake account.

THE RAISE

300 SOL target, paired with SOL

- Presale backers: 45%
- Locked pool: 45%
- Team, 1 year vesting: 6%
- Treasury, 1 year linear: 4%

TEAM AND ROADMAP

Who builds it, and what is next

- Sam Okafor, founder
- Noor Haddad, design

ROADMAP

- Stake routing on devnet, shipped
- Mainnet
