SEED PRESALE

Osprey

Text alerts before your perp position gets liquidated.

THE PROBLEM

Why Osprey

- Most liquidations happen while the trader is away from a screen.
- Exchange push notifications arrive late and are easy to miss.
- Perp volume on Solana passed spot this year.

THE PRODUCT

How it works

- Read-only: paste an address, nothing to sign.
- Distance-to-liquidation computed every block on Drift, Jupiter Perps and Zeta.
- SMS first, then a phone call if the SMS is not opened.

THE RAISE

85 SOL target, paired with SOL

- Presale backers: 45%
- Locked pool: 45%
- Team, 1 year vesting: 10%

TEAM AND ROADMAP

Who builds it, and what is next

- Ines Carvalho, founder and engineering
- Tomasz Wrona, risk maths

ROADMAP

- Drift reader, shipped
- SMS beta, shipped
- Jupiter Perps and Zeta, next
- Voice calls, after that
